

TL11-R250 and TL11-R222 LED

We are proud to present the TL11 IP44 family with LED

TL11-R250 is produced for recessed installation in solid ceilings where IP44-rating is required (DP and OP variants). It is produced according to maritime requirements.

The TL11-R250 has robust steel housing and the steel frame fits housings with screws. It is powder coated white RAL9016 and has double prismatic (DP) or Opalic (OP) plastic sheet in steel frame (IP44) or White grid (WG) plastic in frame (IP20). Suspension brackets (MNT-S) are not included.

It can be used for refit purposes since it fits to old cut outs for old aquas signal 1226 and old Glamox GIM with T8/T12.

TL11-R222 LED is specially designed for shadow panels as Danacoustic or Dampa M300.

The TL11 LED is Nemko marine certified for both EMC1 and EMC2 zone.
